Here, abundant rainfall and fertile, volcanic soil is the perfect incubator for the rich flavours of Muhondo's specialty coffee. With slow growth as such high altitudes, our cherries develop slowly producing mature and well-balanced profiles. You'll detect sweet, citrus, caramel flavours in our exquisite brew.

We have 30,000 trees across 8ha, with 2,394 farmers, 606 of whom are women.

We started small – a family business taking over the operations of the Muhondo Coffee Company Ltd in 2013.

Initially we sold our beans to the local market and other coffee companies. Now we export Muhondo Coffee all over the world, with an annual production of 1000 tons of cherry. We now supply customers in Africa, Europe and Asia ,United State – from international importers to roasters and cafes.

In 2014, Muhondo won the Presidential Award and in 2015 we placed third in the Cup of Excellence awards for impacting the local community through women and youth employment.

We are proud to be among Rwanda's best coffee companies, for our coffee and our social contribution .
